

Natural Action Technologies

Restructure Water

Portable Model

SHOWER Models

Natural action water restructuring—
the result of 40 years of research.

- The internal geometric forms change the water flow.
- This flow transforms the molecular structure.
- This structure is now the living, natural condition of water.

UNDER THE SINK Model

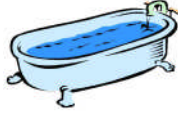

WHOLE HOUSE Model

Energetically Alive

Personal Benefits

- Neutralizes the toxicity of pollutants
- Improved taste of all beverages
- Balanced pH
- Cleaner fish tanks
- Less time cleaning
- Less spotting on dishes, shower glass, cars, sinks, toilets
- Longer life for cut flowers

Owners Report Health Benefits:

- Smooth Skin and Silky Hair
- Feel Cleaner
- Fading age spots
- Decreased blemishes
- Skin tags disappear
- Immune system strengthened
- Fewer colds and Flu
- More energetic and better sleep
- Better memory and increased focus
- Quenches your thirst
- Greater cellular absorption
- Whiter and healthier gums
- Stronger nails
- Reduced junkfood cravings

Financial Benefits

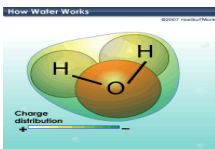

- Use less soap and cleaning supplies
- No need for bottled water
- No need for a water softener
- No need for other water filters
- No need for Alkaline water machines
- Eliminates mineral deposits in pipes
- Less plumbing maintenance
- Decreased chemicals in swimming pools-hot tubs
- Less fertilizer needed for plants-grass
- Less Bacterial growth in septic tanks
- Longer life of appliances
- More yield from garden
- Healthier pets and livestock

Other Benefits

- *Install easily by Yourself*
- *No need to hire a plumber*
- *Comes with all connectors,*
- *Easy installation instructions*
- *On-line installation videos*

How Does This Unit Work

without Filters, Power or Moving Parts??

1. Water is passed over mathematically calculated geometric forms.
2. This produces vortex spins that restructure the water molecules.

For example: Carbon in one structural form is coal.

When geological pressure is applied

the carbon is restructured anda diamond results

3. The restructured water provides a vibratory encapsulation
4. This allows pollutants to pass harmlessly through the human system.
5. This action is vibratory, not chemical,

Pollutants are not removed..... they are neutralized!

Natural Action Water

Energy Medicine for Life

Standard and Dynamically Enhanced Models Explained.....

STANDARD MODELS:

- Have mathematically calculated internal geometric forms that change the water flow.
- Water structures itself as it tumbles across the array of these forms inside the unit.
- Erase negative memories that allow the water to return to its natural, living state.
- Create more energized, wetter, softer, and a more balanced pH water.
- Lower surface tension that allows water to be absorbed effortlessly into body cells.

DYNAMICALLY ENHANCED MODELS:

- Produce the same effects as the standard model, above.
- Have mathematically calculated geometric forms made from proprietary material.
- Have materials that create a static energy before the water is structured
- Produce an energetic unit that is dramatically, energetically enhanced.

Due to FDA rules we can only speak of the properties of the materials in the new units.
 WE MAKE NO CLAIMS.....
